

## **Abel Millot** - France

### **Education for the Future**

Founder and organiser of the International Summit of Education for the Future - ISEFF 2022.

Initiator and co-founder of the International Web Conference on Democratic Education - WebIDEC 2020.

Pedagogue and Teacher : Fallen into a pot of educational potion, he has been teaching mathematics and skiing since the age of 12.

From snow sports to clowning, teaching in primary schools and training therapists, and from innovative experiments to creative teaching, he has rediscovered the foundations of universal education.

### **Why is the IDEC being held here, in the land of Hymalayas and at the Sri Aurobindo Yoga Mandir?**

- o The Hymalaya is the world's symbol of Wisdom and Spirituality, the symbol of human elevation... the place where the highest values of Being are revealed.
- o Sri Aurobinodo's motto is: «All life is yoga»: true yoga is practised 24 hours a day, every day, all your life. It integrates all the dimensions of yoga, the main one being karma yoga, the yoga of selfless action, which is multidimensional, transpersonal and regenerative.

When we look at the world as it is, democracy is associated with capitalism, an apology for personal and economic success... it is associated with power and greed: it is simply a means for the economic powers of this world to reign over the masses in order to perpetuate this economic model.

When democracy takes root in the depths of the soul, it becomes, like the Himalayas, a path of revelation of beings and of the most beautiful spiritual values. It's no coincidence that this major event in Nepal is both an invitation and an impetus for the whole world of education. What a wonderful prospect!

I will share with you my experience of the International Summit of Education for the Future that bears witness to the global convergence towards a new vision of life, education and work: the way of the new democracy.
